

Gemilai[®]

Let's catch up 

Gemilai®

As a leading professional coffee machine brand in China, Gemilai strives to provide high-quality coffee equipment and solutions to global users, passing along the passionate love and technical pursuit of coffee with exceptional products.

Gemilai always aims at the world's cutting edge coffee machines, insists on independent research and development (R&D) innovation, and remains dedicated to the product concept of integrating "Technology and Design". Gemilai has already obtained a number of independent intellectual property rights for commercial and domestic boiler system technology. The core R&D team has more than 20 years of solid experience in the coffee industry. Since its establishment, the business has grown to cover 30 countries and regions around the world, reaching over 2 million cumulative sales volume and serving more than 400,000 users annually. Gemilai is now a major builder and a leading expert for Chinese coffee machine brands heading into the world market.

Looking ahead, Gemilai will continue to cultivate the field of professional coffee machines, concentrating its passion and providing users with a premium coffee experience. Take a sip of delight, and savor the essence of perfection.

Since the beginning of 2013, Gemilai has been pursuing the aesthetic Bauhaus designing style, resonating the beauty of machine architecture with extreme minimalism and skilled craftsmanship. Continually upgrading features and details with professional technology is Gemilai's way of paying tribute to the classics, and a path towards an innovative future.

Double Display Screens. Designed to Give a Clear View of the Extraction. A Simple, Quick Start-Up to a Solid Cup of Coffee

Highly efficient brewing of golden proportions, and a full display of extraction & steam status. Tailor the ideal flavor to suit your taste

Digital display screen

Coffee pressure gauge

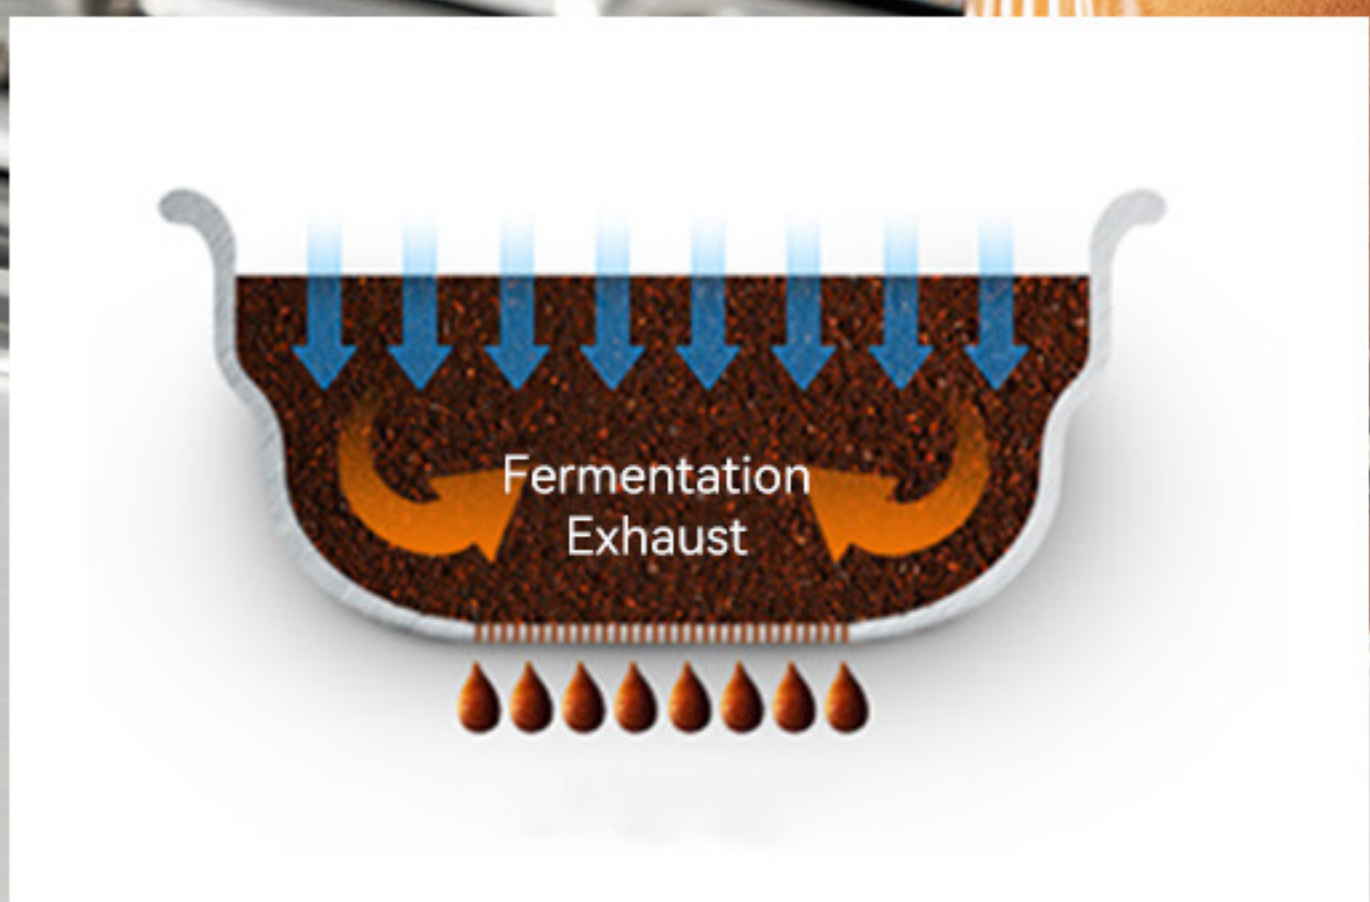

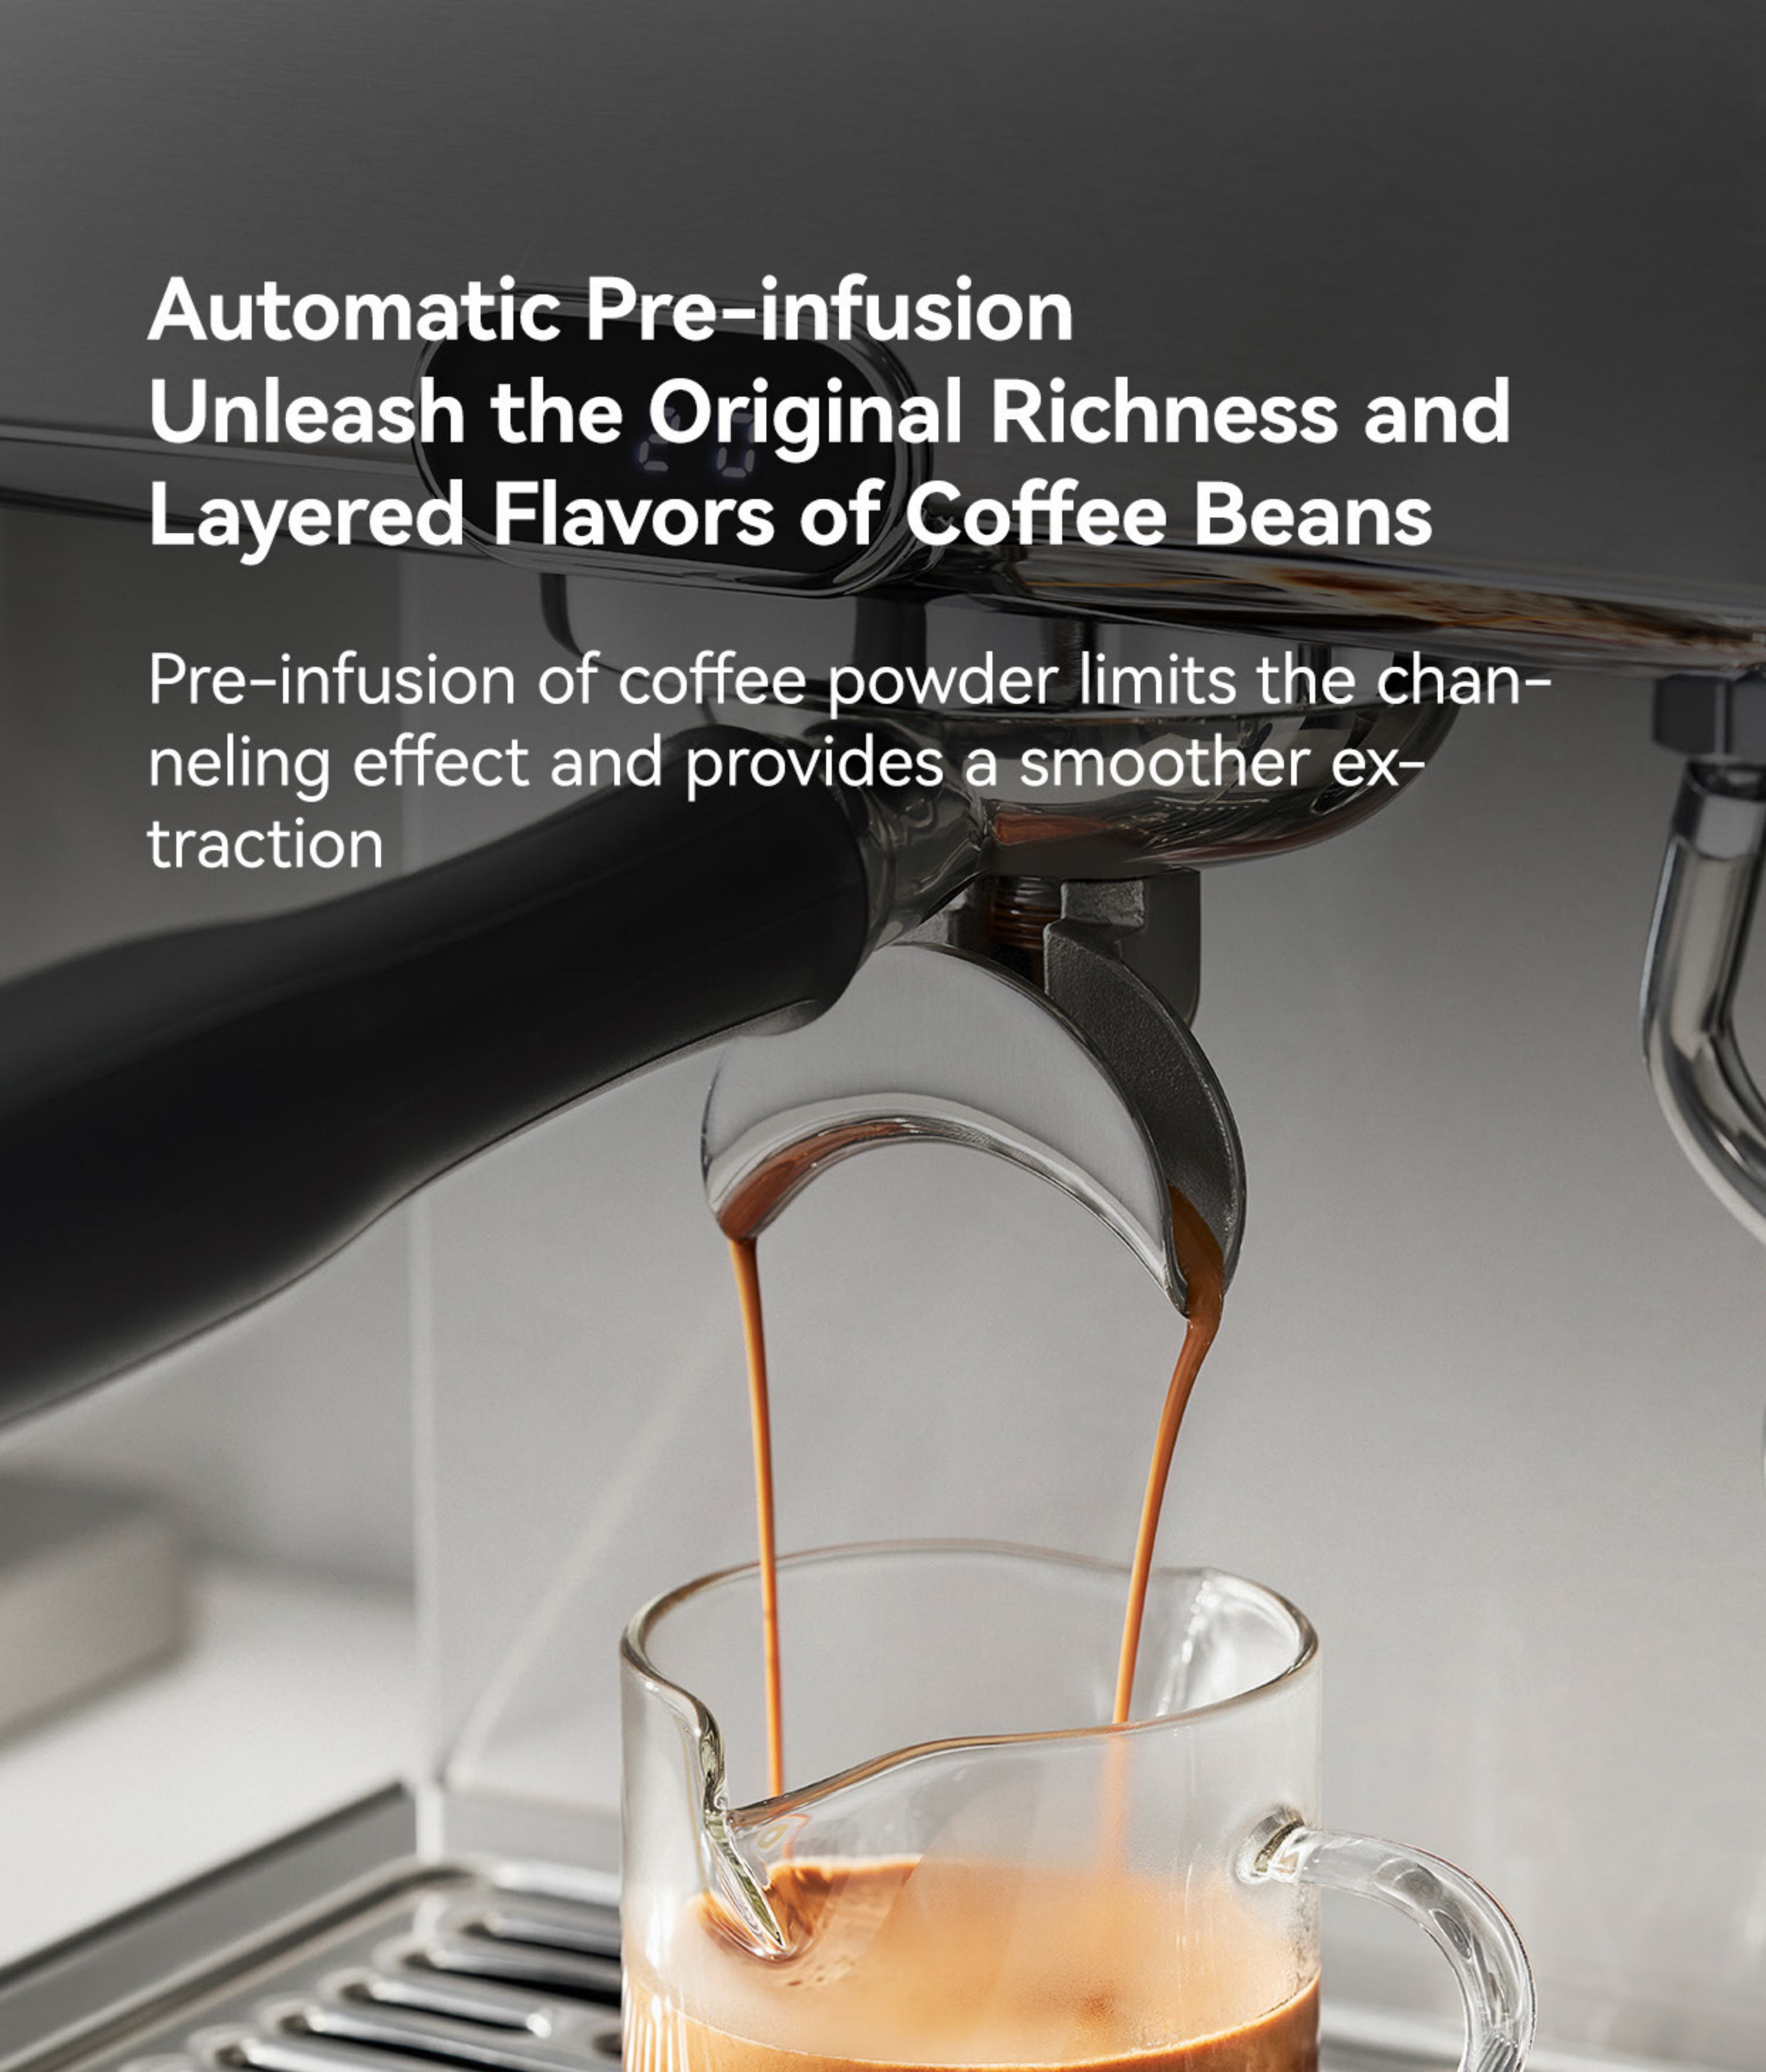

58mm Commercial Brewing System Be Your Own Barista, Make Top-Quality Coffee at Home

A commercial-grade prime extraction, a coffee shop quality production, a cascade of crema in every cup

Automatic Pre-infusion Unleash the Original Richness and Layered Flavors of Coffee Beans

Pre-infusion of coffee powder limits the channeling effect and provides a smoother extraction

Pre-immersion

Pre-moistened powders for better extraction rates. Reduce the breakdown of powder. High mellow taste and richer aroma

Powder not pre-immersed

Powder is not immersed in advance, and the extraction rate is reduced. Powder breakdown is easy to occur. Coffee with a fresh taste and weak aroma

Imported Italian ULKA Water Pump

A 15 Bar Vibratory Pump with Powerful Extraction Pressure, Delivering Fresh and Aromatic Coffee in an Instant

Advanced Touch Sensitivity Improved User Experience

Mechanical touch for buttons ↑

Made with 4 easy-to-use round mechanical buttons, start brewing with a simple touch

Rotary Steam Knob Handy and Sensitive, Easy-Grip With Non-slip Control

Steam knob gripping sensation ↑

Featuring metal material for a more refined design
and a more sophisticated touch

Universal Rotary Steam Wand Effortlessly Whip Up a Cloudy, Milky Froth

Stable, dry steam with adjustable steam wand to meet different frothing angles and techniques

Mini-Size Stainless Steel Body Two Toned Minimalism Perfect for Any Household

Cotton cloud white is soft and elegant, while metallic silver is stylish and versatile, adding a sparkle to your surroundings and creating a cosy spot in your home

Craftsmanship Details
